

RELEASE YOUR INNER GENIUS

FEED BIN MONITORING SYSTEM

Accurate livestock management for feed and animals' consumption 24/7

- Real-time management of performance, health and consumption of your animals.
- Avoid running out of feed by monitoring the level of feed in your feed bin.
- Eliminate the risk of climbing on the feed bin for manual verification of the level of feed.
- Easy to install and use.

This system consists of a compatible GENIUS control with the feed bin monitoring option; each bin will have one GE-FBT/SB, one GE-LIM and one load cell for each leg of the bin.

GE-LIM

The GE-LIM (lighting isolator module) protects the GENIUS control against the effects of lightning.

GE-FBT/SB

The GE-FBT/SB (feed bin transmitter) is connected to the bin load cells.

SB-15K/KIT

The SB-15K (bin load cells) is installed under each leg of the bin and is designed for extreme weather conditions.

Compatible with Genius iTouch and GE-BIN4 controls.

COMPATIBLE WITH:

Online monitoring and management

Management Software
