

# iTouch series

Model shown: 4 variables, 30 relays (2HP)

The Genius iTouch Series is revolutionizing the way we interface and manage with our livestock production controllers.

- ✓ Navigates like an iPad by simply touching, swiping, or dragging your finger on the touch screen.
- ✓ Intuitive system view animation allows for quick confirmation of inputs / output status.
- ✓ Each control comes equipped with 4 USB ports.
- ✓ Available built-in WiFi / WiFarm options for wireless connection to internet or PC.

#### FarmQuest online monitoring and management:

- Powerful management tool.
- Accessible anywhere in the world (where an Internet access is available).
- Continuous downloading of data to facilitate analysis.
- Compare actual results with past results.
- Send warning text messages (SMS) or email when limit conditions are exceeded.
