

# THE NEW APPROACH TO GROWING PIG NUTRITION!

## THE EVO OPTI

Is a standalone feeding system for nursery, finishing and gilt development.

Brings feed blending capabilities to pens on an individualized basis.

### Cost Savings

Less feed bins and feed systems required.

Unlimited number of dietary phases can be created from a limited number of feed bins.

Improves feed conversion in the finisher and GDU.

### Precision

Adjust dietary concentrations in real time to meet animals' evolving needs.

Accounts for deaths and health challenges while minimizing feed budgeting mistakes.

### Peace of mind

The user-friendly software platform allows remote farm monitoring from the mobile app or computer.

Streamlines data management, records pen inventory changes and the quantity of feed a pen is consuming relative to expectations.

### Labor savings

Pigs stay in their original pen while the EVO Opti delivers diet changes as needed.

Daily alerts help users identify problematic pens and plan feed orders more accurately.

SIMPLE. RELIABLE. ORIGINAL.

## STRONG AND DURABLE PRODUCTS.

Engineered for pork producers, by pork producers - our products are tough and versatile.

Official certifications include:

## WHAT MAKES IT UNIQUE.

The EVO Opti is the only system of its kind that **can record and manage complex diet changes** on an individual unit basis, minimizing the risk/impact of system malfunction.

It incorporates the ability to **blend combinations of distinct individual diets** and to **adjust** these mixtures as often as needed over each feeder and pen of pigs.

Each unit is **fully autonomous and 100% standalone**. An **alarm notification system** provides workers with notice of feed bin outages or other irregularities in the barn.

By delivering **customized diets** according to pig's nutrient requirements, over-formulation can be **avoided and nutrient excretion minimized**.

## THE EVO Opti

The EVO Opti is designed for use in commercial and research applications alike. Each standalone unit enables precision feed delivery/blending and prevents residual diet contamination while allowing diet changes from remote access locations.

GESTAL, ALWAYS ONE STEP AHEAD!
