

ENHANCE YOUR SOWS' PERFORMANCE WITH THE

Gestalt
QUATTRO

THE FIRST AND ONLY FEEDING SYSTEM

to optimize feed intake and management in lactation while simultaneously managing the environment of the litter!

gestalt

The next evolution of the Gestal lactation system

Just as you've come to expect from previous Gestal products, the Gestal Quattro stimulates sow feed intake, reduces feed waste and makes sow management easier.

SAVE
\$

Generate electricity savings

No need to add additional electric outlets - the Gestal Quattro shares the same outlet as the heat lamp/mat.

Using customizable heat curves and a temperature probe to adjust piglet area temperature daily, the Gestal Quattro will reduce electricity demands while improving litter performance.

Make sow data management easier

Each feeder is WiFi compatible for rapid data transfer to handheld tablets and to help workers quickly transfer farrowing information and improve in-barn sow monitoring during farrowing.

Individualize each sow's diet

Using two feed lines, the Gestal Quattro will individualize nutrient delivery by custom blending multiple diets according to each sow's prescribed needs.
